

1st ENRICH International Conference "Energy accessibility & efficiency: the importance of Science, Technology and Innovation support services"

Venue: MZUMBE University, Dar-es-Salaam Campus College, Olympio Street – Upanga Dar-es-Salaam, Tanzania, 8th October, 2015

Project	Enhancing Energy Accessibility & Efficiency through establishing sustainable STI Support National Networks with a regional dimension in East Africa
Acronym	ENRICH
Contract Number	FED/2013/330-235

ENRICH Project is co-financed by the European Commission on the framework of the ACP-EU Co-operation Programme in Science and Technology (S&T II) with Grant Contract identification No. FED/2013/330-235. The ACP S&T II Programme is implemented by the ACP Group of States.

TARGET: the 1st edition of the ENRICH International Conference will bring together top management and researchers from Higher Education Institutions, research & project managers, managers from energy industries and the main stakeholders in the energy field (policy makers, professionals, experts and others involved and interested) in the East African region (Kenya, Tanzania and Uganda).

AIM: Energy deficit and energy poverty have become a major obstacle to growth and development in Eastern Africa. One of the major energy issues is price volatility and energy security. Eastern Africa suffers from high prices in the energy market and shrinking natural energy resources. Restricted access to energy resources is hampering the East African region from sustainable development.

Despite the energy emergency in the region, support from research institutes and academia is inadequate to address this situation. However, at the policy level, various countries have stressed the importance of energy access and quality research and innovations. Unfortunately, there is a mismatch between policies, political decisions and societal needs.

The main aim of the 1st edition of the ENRICH International Conference is to bring together top management and researchers from Higher Education Institutions, research & project managers, managers from energy industries and the main stakeholders in the energy field to exchange ideas and promote an effective collaboration in the East African region.

The **objectives** of the International Conference are:

- To enhance awareness of the importance of Science, Technology and Innovation (STI) support services for an operational and effective management of research and innovation on energy access and efficiency.
- To discuss the present situation of the Innovation Ecosystem (STI policies, initiatives and support services) in the East African region.
- To strengthen co-operation links in the energy sector at national and regional level among academia, researchers, industries and policy makers.
- To present the ENRICH project and its developments.

09.00 09.15 15' Welcome and conference opening Acting Vice Chancellor, Prof. Josephat Rika, Mzumbe University Objectives of the conference Noelia López, University of Alicante, ENRICH Project	08/10/2015 (THURSDAY)		RSDAY)	Venue: Dar-es-Salaam Campus College, MZUMBE University
